THIS SURVEY WAS PERFORMED USING GLOBAL POSITIONING SYSTEM (G.P.S.) EQUIPMENT AND PROCEDURES.

THE BASIS OF BEARINGS FOR THIS SURVEY IS BASED ON GRID NORTH, UTAH STATE PLANE COORDINATE SYSTEM, CENTRAL ZONE.

NARRATIVE

This survey was performed at the request of Dry Gulch Irrigation Company in order to locate the corners of the SW1/4 of the SE1/4 of Section 9. This section was originally surveyed in 1882 by the General Land Office using the "Three Mile" method during which the 1/16 corners were set. Additionally, the South line of the section was resurveyed by the Bureau of Land Management in 1996. A search for the monuments marking the Public Land Survey System corners was made with the results noted on the plat. This plat represents the dependent resurvey of a portion of the subdivisional lines designed to restore the corners to their true original locations according to the best available evidence.

SURVEYOR'S CERTIFICATE

This is to certify that this plat was prepared from the field notes and electronic data collector files of an actual survey made by me, or under my personal supervision, of the parcel of land shown hereon, and that the monuments indicated were found or set during said survey, and that this plat accurately represents said survey to the best of my knowledge.
